

WELLNESS RETINAL IMAGING CONSENT FORM

Cirrus OCT (Optical Coherence Tomography)

Dr. Monson and The Butte Family Eye Center are pleased to provide patients with the most advanced technology. As part of your eye exam, we recommend a special diagnostic procedure called Wellness Retinal Imaging. This procedure combines an Optomap Retinal Exam as well as an OCT scan. This is not an x-ray or ultrasound procedure and nothing will touch your eye. We are simply taking a 200° digital photo which can help assess retinal health and detect such problems as retinal detachment or hemorrhages. The infrared OCT scan measures the nerve fiber layer and aids in the detection of eye conditions such as glaucoma and macular degeneration. This gives information beyond what is visible during regular eye examination.

This annual, permanent record is very valuable in assessing the current health of your eye and for safeguarding the health of specific structures of your eye, such as the retina, optic nerve, macula and blood vessels. It will also serve as an initial point of reference from which to compare as we follow your health in subsequent years.

Insurance typically does not cover any advanced screening technology beyond the general exam. We highly recommend the Wellness Retinal Imaging for all patients. This will be done as an enhancement to the general eye exam for a fee of \$49.00. You may choose to do Optomap Retinal Exam only for \$39.00.

Name (please print): _____

_____ Yes, I wish to have Wellness Retinal Imaging for documentation. (\$49.00)

_____ Yes, I wish to have an Optomap Retinal Exam only. (\$39.00)

_____ I would like more information.
